# Journal predator

(<http://www.koranopini.com/blog/jurnal-predator-mangsa-ilmuwan-indonesia>)

- Dibuat untuk memperoleh keuntungan financial
- Mengabaikan etika ilmiah
- Publication fee yang sangat mahal
- Mengirimkan email ke kita
- India, Pakistan dll

# Wajib curiga ketika (source -LIPI)

- Biaya lisensi OA tidak dibuka sebagai opsi, melainkan wajib dilunasi bagi semua penulis sebelum artikel diterbitkan.
- Proses penilaian artikel sebelum diterbitkan (*review*) yang meragukan / basa-basi, bahkan dalam banyak kasus hampir seperti tanpa *review*. Ditunjukkan dengan bagian yang diarsir pada gambar di bawah. Padahal proses inilah yang menjadi garda terdepan kontrol kualitas di sisi pengelola jurnal.

- Daftar Dewan Editor yang terdiri dari para 'pakar' di bidang terkait yang tidak jelas. Setiap peneliti di suatu bidang seharusnya mengenali para pakar di bidangnya. Sehingga bila anggota Dewan Editor terdiri dari orang-orang yang tidak dikenal sudah seharusnya mencurigai eksistensi jurnal tersebut.
- Pengelola jurnal adalah pihak penerbit itu sendiri.
- Rekam jejak jurnal yang sangat pendek, secara umum jurnal yang terbit setelah setelah tahun 2005 yang menganut 4 kriteria di atas patut dicurigai.

# Reputable Journal Publisher

- Elsevier
- Springerlink
- Taylor and francis
- Wiley
- SAGE journal
- dll

# Tips Memilih Journal

- Scopus Q..? Cek [scimagojr.com](http://scimagojr.com)
- Aims and Scope
- Frekuensi penerbitan
- Publication fees

# <http://www.scimagojr.com/> (Jurnal Pengurusan)

The screenshot shows the homepage of the Scimago Journal & Country Rank website. The browser's address bar displays [www.scimagojr.com/index.php](http://www.scimagojr.com/index.php). The website has a navigation menu with links for Journal Rankings, Country Rankings, Viz Tools, Help, and About Us. The main heading is "SJR Scimago Journal & Country Rank". Below this is a search bar containing the text "journal of islamic marketing". A section titled "WHAT IS SCIMAGOJR FOR?" features three icons: a book for "JOURNAL RANKS", a globe for "COUNTRY RANKS", and a bar chart for "VIZ TOOLS". Each icon has an "EXPLORE" button below it. At the bottom, a cookie notice states "This website uses cookies to ensure you get the best experience on our website" with a "Got it!" button. The Windows taskbar at the bottom shows several open applications and the system clock indicating 2:33 PM on 8/1/2017.

# http://emeraldgroupublishing.com/products/journals/journals.htm?id=jima#samples

The screenshot displays the Emerald Publishing website interface. At the top, the Emerald Publishing logo is visible on the left, and navigation links (Home, About, Contact, Site Map, Support, Text View, Emerald Profile) are on the right. A search bar is located below the navigation. The main content area features the 'Journal of Islamic Marketing' with its cover image, ISSN (1759-0833), and a search box. Below this, there are Scopus and CiteScore statistics. A 'Subject Zone' section highlights a news item about the journal's editor. The left sidebar contains a 'Login' section for Airlangga University, 'Product Information' for journals, eJournals, backfiles, books, case studies, and regional information. It also lists 'Services' (Publishing Services) and 'Resources' (Licensing Solutions, For Authors, For Editors, For Reviewers, For Librarians, Research Zone, Learning Zone, Teaching Zone). The bottom of the page shows a Windows taskbar with several open applications and the system clock indicating 2:34 PM on 8/1/2017.

### ABDC releases new Journal Quality List

Tue, 06 Sep 2016

ABDC is pleased to release the online **ABDC Journal Quality List 2016**. This 2016 interim review, aided by public submissions, public consultation feedback, as well as qualitative and quantitative data, has produced a **Final Review Outcomes' Report**.

The interim review focused on **four** tightly defined scenarios:

1. **Inclusion of new business-relevant journals** – journals newly created since 1 January 2011;
2. **Removal of very low quality journals** – e.g. deemed to be "predatory open access" journals;
3. **Switching FOR assignment of a journal**; or
4. **Correction of factual errors** in the ABCD database – e.g. incorrect journal title, incorrect web address.

ABDC would like to thank the overall Review Chair and the following individual FOR Reviewers for their significant input, time and contribution to this review

- Overall Chair: Robert Faff - University of Queensland
- 0806 Information Systems: Julie Fisher - Monash University
- 1401-1499 Economics: Ian King - University of Queensland
- 1501 Accounting: Ken Trotman - University of NSW
- 1502 Finance: Robert Faff - University of Queensland
- 1503 Management: Ingrid Nielsen - Deakin University
- 1504-07 Marketing Tourism Logistics: Geoff Soutar - University of Western Australia
- 1599 Other Commerce, Management, Tourism and Services: Ingrid Nielsen - Deakin University
- 180105/180125 Business and Taxation Law: Kerrie Sadliq - Queensland University of Technology

It is anticipated that the next major full review of the ABCD Journal Quality List will be in the second half of 2017.

See [here](#) for more information on review process and link below for our new journal quality list.

# https://www.aeaweb.org/journals/aer/submissions/guidelines

The screenshot shows a web browser window displaying the submission guidelines for the American Economic Review (AER). The browser's address bar shows the URL: <https://www.aeaweb.org/journals/aer/submissions/guidelines>. The page has a left-hand navigation menu with the following items: Issues, Submissions, Submission Guidelines (highlighted), Tips for Submitting Authors, Guidelines for Accepted Articles, Reviewers, Contact the AER, AEA Journals (Applied Economics, Economic Policy, Macroeconomics, Microeconomics, Journal of Economic Literature, Journal of Economic Perspectives, AEA Papers & Proceedings), Back Issues & SGML Metadata, Subscriptions, Get Journal Alerts, Policies, Copyright, and Permissions, Advertise in AEA Journals, JSTOR access for AEA members, and Athens Subscriber Login.

The main content area contains the following text:

journal. All submitted papers must also represent original work, and should fully reference and describe all prior work on the same subject and compare the submitted paper to that work.

In an effort to prevent plagiarism, the American Economic Association subscribes to CrossCheck to screen its submissions. CrossCheck has a "database of current and archival scholarly literature" and uses the iThenticate tool to "compare authored work against the content in the database and highlight matching or similar text for further editorial review." Submission to AEA journals implies permission of the Association to check the submission electronically for plagiarism, using the CrossCheck system.

Submission fees must be paid by credit card at the time of submission. We are unable to review manuscripts that have been previously rejected by the AER. The AER reserves the right to reject papers without review.

Effective July 1, 2012: All submissions, including revisions, must be accompanied by a **Disclosure Statement**. This is applicable even when the authors have no relevant interests to disclose. Authors will need to provide a separate Disclosure Statement for each coauthor at the time of submission. The statements will also need to disclose whether IRB approval was obtained for the project, and if not, state the reason(s). Submissions that do not include the statements will be considered incomplete and will not be reviewed.

We are unable to review manuscripts that have been previously rejected by the AER. The AER reserves the right to reject papers without review.

### Fees

Submission fees must be paid by credit card at the time of submission. If you have any questions, please contact the Editorial Office at [info@aerjournal.org](mailto:info@aerjournal.org) or call 412-432-2300.

- **Members of the AEA:** \$100
- **Nonmembers:** \$200

Members working in certain low-income countries are permitted lower fees.

>> [View low-income country fees](#)

### Guidelines

**Read guidelines thoroughly. Papers will not be reviewed if they do not follow our submission guidelines.** Papers should be submitted electronically to [Manuscript Central](#).

>> [Submit a paper](#)

Upon receipt of the paper, a confirmation e-mail will be sent electronically.

# Jurnal bereputasi = *peer reviewed journal*

*Menurut Kemenristekdikti (Petunjuk Teknis PermenRistekdikti No. 20/2017) :*

*Jurnal Internasional Bereputasi adalah yang memenuhi kriteria jurnal internasional sebagaimana butir 3 huruf a sampai g, dengan indikator:*

- a.** Diterbitkan oleh asosiasi profesi ternama di dunia atau Perguruan Tinggi atau Penerbit (Publisher) kredibel;
- b.** Terindeks oleh pemeringkat internasional yang diakui oleh Kemristekdikti (contoh Web of Science dan/atau Scopus) serta mempunyai faktor dampak (impact factor) lebih besar dari 0 (nol) dari ISI Web of Science (**Thomson Reuters : Clarivate Analytics**) atau mempunyai faktor dampak (SJR) dari SCImago Journal and Country Rank paling rendah **Q3 (quartile tiga)**;

- c. Alamat jurnal dapat ditelusuri daring;
- d. Editor Boards dari Jurnal dapat ditelusuri daring dan tidak ada perbedaan antara editor yang tercantum di edisi cetak dan edisi daring;
- e. Proses review dilakukan dengan baik dan benar;
- f. Jumlah artikel setiap penerbitan adalah wajar dan format tampilan setiap terbitan tidak berubah ubah;
- g. Tidak pernah diketemukan sebagai jurnal yang tidak bereputasi atau jurnal meragukan oleh Ditjen Dikti/ Ditjen Sumber Daya dan Iptek;
- h. Jurnal Ilmiah Nasional terakreditasi A dari Kemristekdikti yang diterbitkan dalam salah satu bahasa PBB, terindeks di DOAJ dengan indikator green thick  (centang dalam lingkaran hijau) disetarakan/diakui sebagai jurnal internasional bereputasi.

# Mengapa publikasi hasil penelitian itu perlu?

Tujuan dosen/peneliti melakukan penelitian adalah:

- untuk menerima pengakuan atau legitimasi terhadap ide-ide dan hasil yang telah dilakukan.
- untuk memberikan catatan penelitian yang dapat ditambahkan pada hasil penelitian orang lain.
- untuk menarik minat orang lain agar terjun ke bidang penelitiannya.
- menerima umpan balik dari ahli lain terhadap hasil dan ide-ide nya.
- Hal penting lain? **karena kredibilitas dan reputasi** seorang ilmuwan ditentukan terutama oleh kemampuannya untuk berkomunikasi secara efektif melalui karya-karya tulisnya.

# Mengapa mempublikasikan hasil penelitian itu sulit?

- Selain hambatan terkait **bahasa (Bahasa Inggris)**, juga penting untuk disadari bahwa menulis adalah keterampilan (*skill*) apa pun bahasanya;
  - Bagi ilmuwan yang bahasa Inggrisnya bukan sebagai bahasa utamanya dan bahasa Inggris sebagai bahasa utama mereka.
- Menerbitkan tulisan agar dapat diterbitkan juga merupakan keterampilan; sehingga tidak semua penulis tulisannya dapat diterbitkan.
- Karena tidak semua hasil penelitian **bersifat baru** atau memiliki **nilai** atau **kepentingan ilmiah yang memadai**.
- Karena penelitian **tidak selalu mendapatkan hasil yang baik**. Hasil yang **positif** dan **significant** lebih mudah untuk mempublikasikannya.
- Jurnal ilmiah memiliki persyaratan tertentu yang mungkin sulit untuk dipenuhinya. Harus sesuai keinginan pasar dan *audiensnya*. Misal: Nature: editor lebih menentukan dari refereesnya

# “Pendahuluan (Introduction)” harus menarik

- *Editor* adalah orang pertama yang membaca (sekaligus sebagai *reviewer* atau *referee*) bagian “Pendahuluan (*Introduction*)” dari naskah ilmiah kita.
- Oleh karena itu pengantar yang menarik tentang isi naskah ilmiah sangat penting dituliskan dalam bagian Pendahuluan ini. Di dalam Pendahuluan harus menjelaskan beberapa hal penting tentang:
  - **Apakah terdapat kontribusi baru dalam penelitian kita?**
  - **Apakah kontribusi tersebut signifikan?**
  - **Apakah cocok untuk publikasi di jurnal tersebut?**

# Menghadirkan *gap* dalam Pendahuluan

Hal penting lainnya ketika menyusun Pendahuluan adalah kemampuan menghadirkan adanya ***gap*** (kesenjangan) antara penelitian yang sudah dilakukan dengan penelitian yang sedangkan kita lakukan.

Untuk mengenal adanya ***gap*** biasanya penulis menggunakan kata-kata yang spesifik ketika menyusun suatu pernyataan, sebagai contoh: ***however, rarely, not well understood, few data, presently unclear and remain a major challenge.***

Berikut adalah contoh menghadirkan suatu *gap* dalam sebuah pernyataan :

- **However**, understanding how these processes interact to regulate invasions remains a major challenge in ecology.
- Despite its acknowledged importance, propagule pressure has **rarely** been manipulated experimentally and the interaction of propagule pressure with other processes that regulate invasion success is not well understood.
- It is presently **unclear** how different disturbance agents influence long-term patterns of invasion.
- Most studies of copper toxicity to *L. vannamei* have been conducted in single stage, mostly in postlarvae or juvenile, and **few data** are available about copper toxicity at different life stages of this shrimp.

artisanal gold mining located at upland of the District of Sekotong. The coastal villagers of this region depend on fisheries resources including *A. granosa* and *A. antiquata* for daily food as cheap source of protein. The potential negative impact of Hg to food safety should therefore be evaluated. To our knowledge there are no available data on the levels of Hg in cockles from estuaries of WLI. The previous data evaluated the mercury concentrations in paddy rice grains which were harvested from paddy fields near the artisanal gold mining (Krisnayanti et al. 2012). This study contributes a second dataset evaluating mercury contamination in a WLI aquatic food consumed by people. Besides having an important economic value cockles like other bivalves have already been proposed as biomonitoring organisms to assess metals pollution due to their capability to accumulate metals within their tissues (Sajwan et al. 2008). Brock and Wolowicz (1994) reported that the biochemical composition of cockle *Cerastoderma glaucum* tissue was different for populations from Northern Europe, French west coast, and the Western Mediterranean. Cockles *A. granosa* and *A. antiquata* can be found from East Africa to Polynesia, Japan and south to northern and eastern Australia (Poutiers 1998). Due to their widespread distribution, cockles can be used as biomonitoring organism for comparative study.

The objectives of the present study are to measure the level of total mercury (tHg) in whole tissues of cockles (*A. granosa* and *A. antiquata*) harvested from estuaries of WLI, to evaluate its hazard level in relation to the maximum residual limit for human consumption, to estimate the weekly intake, and to compared it with the provisional tolerable weekly intake (PTWI).

Most of grouper culture was held in marine and brackish water ponds. However, recent study reported that goliath grouper (*Epinephelus itajara*) potentially can be cultivated in freshwater. The aquaculture of goliath grouper has not been well established, because the seeds or juveniles are mainly supplied by wild catch (Chapman et al. 2014). In contrary, the aquaculture of tiger grouper (*E. fuscogutattus*) has been well established because the seeds can be supplied from the hatcheries (Rimmer et al. 2004). Cheng et al. (2013) reported that tiger grouper tolerated to freshwater although they did not mention their survival time period. To our knowledge, there are very few data concerning the freshwater rearing of a well-established cultured grouper species.

Hybrid grouper of this study was a new and promising aquaculture candidate resulted from breeding of female tiger grouper (*E. fuscogutattus*) and male giant grouper (*E. lanceolatus*). The first hybridization trial took place at Center of Brackish water Aquaculture in Situbondo (CBAS), East Java, Indonesia. This hybrid has considerable growth rate compared to its parents. The hybrid takes 6–7 month to grow to about 1 kg, while its parents need more than a year (female parent) or 8–9 month (male parents) to grow to the same size. Moreover, this hybrid has better feed conversion ratio than its female parent (Sutarmat and Yudha 2013).

- Crayfish are known to be present in the river, river floodplain, and lake of southern part of Papua Indonesia. They are collected and eaten by local people in all regions, particularly during the dry season when water level is low. **The crayfish of the island of Papua Indonesia and New Guinea were extensively studied by Holthuis (1949, 1956, 1958, 1982, 1986, 1996), Lukhaup and Pekny (2006, 2008), Lukhaup and Herbert (2008), Lukhaup (2015), and Lukhaup et al. (2015) and Patoka et al. (2015); however all previous studies were focused on the morphological description of the new species of Cherax. To our knowledge, very few studies have been conducted concerning the growth of crayfish in their natural habitat. Measuring individual body length and weight is a basic procedure in the scientific study of a species. The length-weight relationship (LWR) is a useful tool to estimate growth rate and size of the population (Lindqvist and Lathi, 1983).**

## Hati-hati dalam mengutip tulisan peneliti lain

- Karena kita tidak pernah tahu bahwa sangat mungkin *referees* yang me-*review* naskah kita saat kita ajukan ke sebuah jurnal internasional adalah **pemilik asli ide-ide yang kita kutip**.
- Jika kita tidak akurat mengutip karya mereka sementara mereka menelaah naskah kita, sangat mungkin kita dianggap **ceroboh dan tidak akurat dalam mensitasi**.
- Akibatnya bisa saja semua kutipan di naskah kita dianggap ceroboh dan tidak akurat juga, dan akhirnya *referees* menolak naskah kita.
- Dalam banyak hal, *referees* juga sangat mengerti dengan baik literatur-literatur yang tersedia, sehingga dalam mengutip pendapat ahli lain harus dilakukan secara akurat.

# METODE PENELITIAN

Bagian Metode dalam suatu karya tulis ilmiah umumnya memberikan informasi kepada pembaca agar mereka dapat mengulangi pekerjaan yang terdapat dalam karya ilmiah tersebut.

Dengan mempelajari Metode, kita dapat mengetahui **kredibilitas suatu hasil penelitian**. Oleh karena itu, Metode harus memberikan informasi yang lengkap tentang berbagai hal yang berkaitan dengan pekerjaan penelitian. Referees cenderung melihat dengan seksama bagian Metode, sebagai bukti untuk menjawab pertanyaan apakah Metode dan Hasil telah sesuai dengan standar ilmiah atau belum?

## Ditulis dengan sangat detail dan lengkap

Flat-bottom, 96-well microtiter plates (SPL Life Sciences, Gyeonggi-do, Korea) were coated with antigen diluted in 1:40 with carbonate buffer (0.1 mol/L, pH 9.6), incubated overnight at 4 °C, decanted, and washed 6 times with 100 µL PBS containing 0.2% Tween-20. Plates were incubated with 2% bovine serum albumin (Sigma-Aldrich Chimie, Deisenhofen, Germany) in PBS, 100 µL/well, for 1 h at room temperature, then washed 3 times with 100 µL PBS-Tween-20. A dilution (1:800) of the rabbit polyclonal MT antibody (Santa Cruz Biotechnology, Santa Cruz, CA, USA) with assay buffer (BSA-PBS-Tween-20) was added at 100 µL/well as a primary antibody. After 1 h at room temperature, the plates were washed 6 times with PBS-Tween-20. A dilution (1:800) of biotinylated anti-rabbit IgG (H+L) antibody (Kirkegaard and Perry Laboratories, Gaithersburg, MD, USA) with assay buffer was added at 100 µL/well, and incubated for 1 hour at room temperature as secondary antibody. The plates were washed 6 times with PBS-Tween-20. Aliquots of 100 µL Streptavidin-horseradish peroxidase (Dako Agilent Technologies, Glostrup, Denmark) diluted with assay buffer (1:800) were added to each well, incubated for 1 h at room temperature, and washed 6 times with 200 µL PBS-Tween-20. Then, 100 µL substrate sure blue tetramethylbenzidine Microwell Substrate (Kirkegaard and Perry Laboratories) was added to each well, and incubated for 30 min at room temperature in a dark room. Enzyme action was stopped by adding 100 µL 1 mol/L HCl to each well, and after 10 min, absorbance was measured at 450 nm in an automatic microtiter plate reader (Stat Fax 3200, Awareness Technology, Palm City, FL, USA).

### *2.3.1. Determination of Cd*

Fish were sacrificed by rapid spinal transection and the gills were dissected and stored at -20°C until Cd determination as described by Asmysari, Irawan, and Soegianto (2013).

Cd concentrations were expressed as mg/kg dry weight (dw). Analytical blanks were run in the same way as the samples, and concentrations were determined using standard solutions prepared in the same acid matrix. The accuracy of the Cd determination was verified using dogfish muscle reference material (DORM-2) provided by the National Research Council of Canada (Ottawa, Canada), with Cd recovery of 106% and detection limit of 0.002 mg/kg dw.

# Hasil Penelitian

Kalimat pada bagian Hasil biasanya:

- Menyoroti temuan penting dalam penelitian (terutama temuan yang akan menjadi bagian yang akan dibahas di bagian Pembahasan (Discussion)).
- Menunjukkan lokasi Gambar atau Tabel dimana Hasil dapat ditemukan, dan
- Mengometari hasil (bukan membahas).
- Tidak mengulang kata-kata yang sudah dijelaskan dalam tabel atau gambar ketika menulis hasil penelitian

# Pembahasan

Jenis-jenis informasi yang dimasukkan ke dalam bagian Pembahasan:

- Mengacu pada tujuan utama atau hipotesis penelitian, atau kegiatan utama penelitian.
- Temuan penting yang telah didapatkan, dengan memperhatikan urutan signifikansinya, termasuk apakah mereka mendukung hipotesis atau tidak, dan sejauh mana mereka berkontribusi pada tujuan utama penelitian kita. Apakah hasilnya sejalan dengan temuan peneliti lain.
- Penjelasan terhadap temuan-temuan dalam penelitian harus didukung dengan pustaka (literatur) yang relevan.
- Implikasi dari hasil penelitian (generalisasi dari hasil: apakah hasil penelitian bermanfaat untuk konteks bidang yang lebih luas).
- Rekomendasi untuk penelitian masa depan dan/atau aplikasi praktis.

# JUDUL MAKALAH

Judul merupakan bagian penting dalam sebuah makalah karena mempunyai peranan penting untuk berkomunikasi dengan **pembaca**, juga dengan **editor dan referees** yang akan mengevaluasi makalah kita. Judul harus jelas, menunjukkan isi makalah dan menarik perhatian pembaca.

- **Judul harus memberikan informasi yang relevan namun ditulis singkat (100 karakter atau 10-12 kata).**
- **Menggunakan kata kunci menonjol**
- **Pernyataan atau pertanyaan?**
- **Menghindari ambiguitas penggunaan kata benda dan kata sifat**

**Kata kunci:** kata-kata yang sudah tercantum dalam judul tidak harus diulang sebagai kata kunci.

# JUDUL MAKALAH

Judul merupakan bagian penting dalam sebuah makalah karena mempunyai peranan penting untuk berkomunikasi dengan **pembaca**, juga dengan **editor dan referees** yang akan mengevaluasi makalah kita. Judul harus jelas, menunjukkan isi makalah dan menarik perhatian pembaca.

- **Judul harus memberikan informasi yang relevan namun ditulis singkat (100 karakter atau 10-12 kata).**
- **Menggunakan kata kunci menonjol**
- **Pernyataan atau pertanyaan?**
- **Menghindari ambiguitas penggunaan kata benda dan kata sifat**

**Kata kunci:** kata-kata yang sudah tercantum dalam judul tidak harus diulang sebagai kata kunci.

# Contoh

**Title:** Effect of sub-lethal lead exposure at different salinities on osmoregulation and hematological changes in tilapia *Oreochromis niloticus*

**Keywords:** fish; Pb; blood; erythrocytes; leukocytes; ion

**Penulisan daftar pustaka sistem Harvard, seperti ditampilkan di bawah ini.**

# DAFTAR PUSTAKA

- Ada ratusan variasi gaya penulisan referensi.
- Perlu dicatat bahwa beberapa jurnal membatasi jumlah referensi yang boleh dikutip; sehingga mengecek dengan teliti instruksi untuk penulis (Instruction to Authors) perlu dilakukan.
- Umumnya untuk *full articles* (makalah penelitian) dibatasi tidak lebih 40 pustaka dan untuk *short communication* dibatasi tidak lebih dari **10 referensi**.

# UCAPAN TERIMA KASIH (**Acknowledgment**)

1. Ucapan Terima Kasih biasanya terletak antara bagian Pembahasan dan Daftar Pustaka (Referensi).
2. Organisasi atau individu yang memberikan bantuan finansial, bantuan bahan penelitian, bantuan teknis atau saran dapat dituliskan di bagian ini.
3. Beberapa jurnal bahkan mewajibkan kepada penulis untuk menuliskan nomer kontrak jika ada lembaga donor yang mendukung pekerjaan penelitian.
4. Orang yang tidak berkontribusi secara langsung dalam penelitian, misalnya mereka yang membantu kesekretariatan (misalnya pengetikan naskah) dan pekerjaan rutin laboratorium tidak perlu disebutkan di bagian ini.

# Authorship

Setelah menyelesaikan percobaan dan analisis data, seluruh anggota tim peneliti harus menyadari akan tanggung jawab masing-masing dan menyetujui urutan penulis yang dicantumkan dalam naskah. Urutan **authorship** umumnya didasarkan pada:

- Definisi masalah
- Pengembangan rencana penelitian
- Pelaksanaan rencana penelitian
- Analisis statistic
- Produksi naskah (menulis)

Beban kerja yang diberikan ke setiap anggota tim bervariasi menurut **negara dan budaya, tetapi harus konsisten dengan praktek ilmiah internasional.**

Biasanya **satu orang yang mempunyai tanggung jawab paling besar dalam penelitian dan dapat menjawab dengan rinci pertanyaan-pertanyaan yang diajukan harus menjadi penulis pertama.**

- Jika naskah disusun oleh banyak penulis, maka perlu ditunjuk **corresponding author**, adalah orang yang dapat menjawab pertanyaan dengan baik, yang telah menyiapkan naskah dan mengelola proses review (penelaahan), serta mudah ditemui bila ada orang atau pihak lain yang mengajukan pertanyaan. Seorang **profesor atau pembimbing** biasanya berperan sebagai **corresponding author** terutama dalam kasus bila seorang mahasiswa tidak tahu apakah dia akan datang kembali tahun berikutnya ke laboratorium atau lembaga tempat ia meneliti sebelumnya.
- Orang yang memiliki otoritas politik (seperti yang mendukung dana penelitian, memberikan kemudahan untuk menggunakan peralatan penelitian), tapi tidak ada keterkaitan khusus dengan penelitian, biasanya diberi ucapan terima kasih dalam bagian terpisah di **acknowledgement**, namun mereka tidak terdaftar sebagai penulis.

Ada beberapa rujukan Tim PAK dikti dalam melakukan penilaian terhadap karya ilmiah yang diterbitkan pada jurnal ilmiah antara lain:

1. ISI Knowledge -Thomson Reuter (USA )
2. SCOPUS (Netherland),
3. Microsoft Academic Search,
4. Ulrich'sPeriodicals Directory (Proquest)
5. Academic Search Complete (EBSCO)
6. Zentralblatt MATH ( Springer – Verlag)
7. DOAJ (Lund University Swedia)
8. Peridoque (EP Lausanne Switzerland)
9. SHERPA/RoMEO (Nottingham University, UK)
10. Index Copernicus(Poland)
11. Google Scholar

- Ada beberapa pedoman dalam penilaian karya ilmiah yang di acuan oleh TIM PAK Dikti., salah satunya mengenai penilaian terhadap kredibilitas penerbit jurnal dan klasifikasi terhadap penilaian karya ilmiah yang dipublikasikan di jurnal;
- Jurnal Nasional dengan bobot nilai 10 dan yang terindeks di DOAJ dengan bobot 15.
- Jurnal Nasional Terakreditasi DIKTI, dengan bobot nilai 25.
- Jurnal Internasional, dengan bobot nilai 20 apabila tidak terindeks di Scopus, Web of Science, dan Microsoft Academic Search, tetapi terindeks di DOAJ, CABI, Coprenicus, Ebscho.
- Jurnal Internasional Bereputasi, dengan bobot nilai 40 jika terindeks di Scopus, Web of Science, dan Microsoft Academic Search dan memiliki Imfact Factor dari ISI Web of Science atau Schimago Journal Rank, apabila tidak memiliki Imfact Factor maka bobot nilai adalah 30.

# Adapun kriteria jurnal ilmiah adalah sebagai berikut;

1. Karya ilmiah ditulis dengan memenuhi kaidah ilmiah dan etika keilmuan.
2. Memiliki ISSN
3. Memiliki terbitan on-line
4. Dikelola secara professional
5. Bertujuan menampung/mengkomunikasikan hasil-hasil penelitian ilmiah
6. Ditujukan kepada masyarakat ilmiah
7. Diterbitkan oleh penerbit oleh Penerbit/Badan Ilmiah/Organisasi Profesi/Perguruan Tinggi
8. Bahasa yang digunakan adalah bahasa Indonesia
9. Memuat karya ilmiah dari penulis yang berasal dari minimal dua institusi yang berbeda
10. Mempunyai dewan redaksi/editor yang terdiri dari para ahli di bidangnya

# Daftar Jurnal Internasional Bereputasi Terindeks Scopus 2019

**Journal Metrics**

Scopus Journal Metrics offer the value of context with their citation measuring tools. The metrics allow for direct comparison of journals, independent of their subject classification. To learn more, visit: [www.journalmetrics.com](http://www.journalmetrics.com).
